<i>List of Figures</i>	ix
<i>List of Tables</i>	xi
<i>Introduction</i>	xiii
1 In the Know – The Knowledge Economy in the Twenty-first Century	1
A brief history of knowledge	1
The growth of knowledge	4
Technological research and development	5
2 Knowledge is Power	12
Science and science policy	12
Future proof – the need to monitor knowledge	15
Knowledge is power: creating and diffusing new knowledge	16
Knowledge is power: productivity and economic structure	18
Knowledge is power: new entrants in the global knowledge stakes	20
Made in Japan: a knowledge economy adjusts to low-cost rivals	22
Knowledge is power: towards a strategy for increasing innovation	24
3 Head Knowledge – Modern Intellectual Property Rights	27
What exactly are IPRs?	27
Practical protection for IPRs	29
Foreground and background IPRs – ownership issues	35
What are foreground and background IPRs?	36
A vexed question – ownership and use of background rights	37
4 Intellectual Property Rights: Current Developments	39
Possible changes in the US patent regime	39
Problems with existing patent arrangements	40
Restrictions in the flow of knowledge	41
Just what can and cannot be patented?	42
The battle to join the ‘developed world’	44
Some suggestions on IP legal development	45
IP and tax havens	48
The European patent	50

5	Why Buy Knowledge?	52
	The role of the modern manager	52
	Knowledge acquisition strategies and types of integration possible	56
	Is external knowledge acquisition increasing?	57
	Strategic choices for organizations	58
	Intellectual capital	59
6	Planning to Buy Knowledge	64
	Due diligence issues	64
	Competitive tender or negotiation?	69
	Specifying the work	72
	Contract pricing strategy	74
	The need for effective project management	75
7	Knowledge Transfer	80
	Knowledge-base assessment	81
	Developing a transfer model	86
	Staff shadowing	88
	Skills transfer	89
	Embedding knowledge	91
	Benefits realization	95
8	Working with Consultants	99
	Professional services – professional servants!	99
	Challenging the demand	102
	Defining the requirement	104
	Identify service providers	106
	Establish budget costs	108
	Shortlisting of suppliers	110
	Invitation to tender	111
	Tender evaluation	112
	Award, engagement and debrief	113
	Delivery	115
	Disengagement	116
9	Working with Contract Research Organizations	118
	Why buy in R&D services?	118
	Strategy issues	121
	Contract research as a strategy to increase innovation	124
	Why buy knowledge when you can buy the owner of the knowledge?	126

How to work successfully with a CRO	128
Conclusion	131
10 Knowledge Factories – Buying Knowledge from Universities	132
Universities as knowledge brokers	132
Problems in buying research from universities	134
Pitfalls to be avoided	137
Research fellowships	139
Royalties	139
Appendix 1 – The Outsourcing R&D Toolkit	142
Appendix 2 – Project Memo	144
Appendix 3 – Watch Your Service Bills!	145
