Contents

<i>List of Figures</i>	<i>ix</i>
<i>List of Tables</i>	<i>xiii</i>
<i>Preface</i>	<i>xv</i>
PART I RISK MANAGEMENT OVERVIEW	1
1 Risk in Context	3
Risk management	3
Quantitative risk analysis	4
Estimating risk	6
2 A Brief Introduction to Risk Management	9
Taking stock	9
Risk vocabulary	10
The risk management process	16
Risk assessment	17
Information systems	29
3 Quantitative Risk Estimates	33
Taking stock	33
Representing uncertainty quantitatively	34
Risk models	38
Dependence between cost and sales	40
Modelling correlation	41
The core concepts	44
Real risk models	47
Risk registers and risk models	53
Summary	54
4 Using Risk Models	57
Moving forward	57
ABC _o and its business plan: talking about risk	57
The waste management PPP	60
The bidder perspective	61
The subcontractor perspective	72
The client perspective	73
Negotiating	74
Managing the job	74
Summary	76

PART II	RISK MODELS	79
5	Reliability and Other Binary Models	81
	Overview of reliability modelling	81
	Fault and event trees	84
	Summary	91
6	Cost and Other Additive Models	93
	The ABCo model	93
	The waste management PPP	99
	Summary	115
7	Time and Programme	117
	Schedule risk analysis	118
	Contingencies	123
	Summary	126
8	General Models	129
	Influence diagrams	130
	Bayesian networks	132
	Decision trees	134
	Summary	135
PART III	DECISIONS AND RISK	137
9	Public Sector Decisions	139
	The Green Book	139
	Procurement and risk transfer	144
	Summary	147
10	Private Sector Decisions	149
	What investors expect and what they get	149
	What managers do	152
	Can risk transfer be value for money?	154
11	Safety Decisions	157
	A brief history of safety risk modelling and its use	157
	Risk based regulation – a rational dream	160
	The awakening	163
	What does it mean for business risk modellers?	168
PART IV	TECHNIQUES	171
12	Probability	173
	Random processes and random variables	173
	Probability distributions	175
	Mean, variance and percentiles	179
	Some more useful distributions	180
	Multiple events, conditional probabilities and independence	184

	Joint probability distributions and correlation	186
	Functions of several random variables	188
	Some approximations	189
	Is probability relevant	192
13	Monte Carlo	195
	The Monte Carlo concept	195
	How to do Monte Carlo simulations	197
	Modelling dependence	198
	Visualisation and importance	200
	Sampling and estimation	207
	Summary	213
14	Other Methods	215
	Exact methods	215
	The direct method	217
	Discrete probability distributions and Bayesian networks	218
	When Monte Carlo does not work	219
	Summary	222
15	Decision Analysis	223
	Decision theory	223
	Multi-attribute decisions	229
	Decision trees	230
	Summary	234
	<i>Index</i>	235
	<i>About the Author</i>	241
